[C2G USB 1284 DB25 Parallel Printer Adapter interface cards/adapter:](#)

The USB to DB25 IEEE-1284 Printer Cable by Cables To Go enables a parallel printer to be connected to a USB port on a PC or hub. This is ideal for computers without a parallel port or in order to free-up the parallel port for a Zip drive or scanner. If you have multiple printers, you can eliminate the need for a switchbox by connecting each printer to a USB port. The device is fully transparent to the user and is ideal for true bi-directional communication.
