- LED indicators for computer status or data transmission
- Switch computers by push button or hotkey commands
- · Audible feedback when switching
- Work with PS/2 or USB computer
- 3-in-1 space saving design

## **Description**

The KVM-9036 Cat.5 USB Extender Kit is a pair of devices (Transmitter and Receiver) for highdensity applications where you want full use of the keyboard, mouse, and monitor, but there is no room for a

server nearby. It allows users to access a computer, server or KVM switch up to 100m away. Or for applications where you want to put all computers in a safe place, all that is needed on the desktop is a single keyboard, monitor, and mouse. KVM-9036 has auto-adjustable RGB gain/delay control capability for superior video performance.
