

Short Description

- Cable tester for RJ11, RJ12, RJ45, BNC & PoE
- Loop test, remote test, Loop test, remote test, PoE test
- Read results easily via LED indicators
- Suitable for patch cords and installed cables
- Tests continuity, connection, wiring and shorts
- Identifies the existence and type of PoE (Midspan or Endspan)
- Automatic or manual test possible
- Power: 9V block battery (not included)
- **no batteries included

Description

The Network Cable Tester is a versatile tool designed for the verification and troubleshooting of various types of network cables. Supporting RJ45 and BNC connectors, it ensures comprehensive testing for both Ethernet and coaxial cables. Additionally, it incorporates Power over Ethernet (PoE) testing capabilities, allowing users to assess the functionality of PoE-enabled networks.

The device facilitates the quick identification of wiring faults, such as open circuits, short circuits, and incorrect wiring, contributing to efficient network maintenance and installation processes. With its compatibility with RJ45 and BNC connectors, it accommodates the testing needs of diverse network environments, including Ethernet and CCTV setups.

The inclusion of PoE testing capabilities is particularly valuable in modern network setups where PoE is commonly used to power devices like IP cameras, access points, and VoIP phones through the same cables that transmit data. This feature enables users to confirm the availability of power and ensure the proper functioning of PoE-supported devices.

Additional Information

Color	Black
EAN	4015867236550
Model Number	129968
Approval and Compliance	CE, ROHS
Package Contents	1 x Main tester device 1 x Remote tester device 1 x PoE tester device 2 x BCN adapter cable 1 x BNC plug/plug adapter 3 x RJ45 to RJ11 adapter 1 x Quick Installation Guide 1 x Hard shell case
Dimensions (W x D x H)	109 x 23.5 x 80 mm
Product weight (kg)	0.16
