

RollerMouse Go

Smaller in size – not in functionality

RollerMouse Go offers a compact and wireless iteration of Contour's renowned central mouse design, easy to carry around to work without tension and pain wherever you are located. Its unique rollerbar design promotes a more dynamic working posture, ensuring that both hands are comfortably and naturally positioned in front of you for cursor navigation. The included black cover provides both wrist support when folded and protection during transport.

Whether you're working remotely, as a travelling consultant, studying, or adapting to flexible work environments, the RollerMouse Go is designed to prevent and alleviate tension and discomfort in your body.

Full size RollerMouse at the table

RollerMouse Go Dock converts the compact RollerMouse Go to standard width for optimized wrist rest support. The mouse is magnetically attached to the dock, making it simple to dock and undock. Perfect for the home office or the permanent office desk.
