## Overview

---

HID Global offers a variety of logical access and converged solutions, enabled by the use of a single credential for both physical and logical access. HID's primary product lines making up this solution include

- Hardware components: ActivID®, iCLASS®, iCLASS SE®, Crescendo® and OMNIKEY®
- Software components: HID Identity Assurance product portfolio including naviGO®, ActivClient™ and ActivID CMS.

No matter where you are in your efforts to improve risk management and physical/data security processes, there is an HID solution to help you.

This How to Order Guide focuses on the hardware product lines described above. For the software components, reference HID Identity Assurance: <https://www.hidglobal.com/identity-assurance>.

Visit <https://www.hidglobal.com> Product section for more information.

## Announcement regarding Credentials Marking

As a part of our commitment to continuous enhancements of world-class products and solutions, HID Global is transitioning to the most innovative card marking technology available.

Effective immediately, HID Global is moving from ink jet card marking to the new laser engraving card marking technology for all Genuine HID® cards, fobs and authentication tokens. This state-of-the-art laser engraving technology will result in a more appealing look and feel and reduce the ecological footprint of card production.

All relevant orders in the United States and Canada are affected immediately.

Key benefits:

- Marking quality and durability of the cards will be enhanced and more consistent
- New engraving technology reflects HID Global's commitment to sustainability by eliminating the use of solvents
- Improved Proof of Authenticity since engraved markings cannot be removed or modified.
- The enhanced design will be available at no additional charge. The laser-engraving surcharge for Genuine HID Proximity and Contactless Credentials will be removed in November.

Depending on the fulfillment center, customers may receive either inkjet or laser marked cards during the transition period of October 2014 – June 2016. All ID1 cards (Clamshell Cards included), key fobs (including Microtags, Keytags and Microprox) and authentication tokens will have the enhanced laser engraving design immediately.

**Notes:**

- The numbering scheme and part number will not change. Please contact your sales representative to see the new design and get sample cards.
- Due to the 3D nature of laser engraved markings, printing over these markings is not recommended as it may impact print quality.
- For all relevant Credentials ordered and/or shipped out of North America, the laser-etched version supersedes all ink jet card part numbers.
- For further details on the printing areas, please contact HID Global.

Please contact HID Customer Service or Sales Representative if you have additional questions regarding this notice.

## Cards

### Crescendo

- A powerful embedded contact smart chip with cryptographic co-processor is used for logical, physical access control and enables Crescendo to perform as a PKI card in both Microsoft® and heterogeneous IT environments. To meet the needs of current physical access control customers, choose to customize Crescendo with the Physical Access Control technologies: Prox (HID, Indala® and others), iCLASS, MIFARE®, multi-technology combinations and magnetic stripe.
- Crescendo Smart Cards are standards based.
- They work with all PC/SC based smart card readers (including built-in readers in laptops) available on the market. In addition, Crescendo Smart Cards are supported in many third party applications.
- The Crescendo card is made of highly durable composite plastic. Customize Crescendo cards with pre-printed graphics and anti-counterfeiting elements. Fully personalize Crescendo cards with variable data – photos, text and barcodes.
- Crescendo products C1100 and C1150 are optimized, tested and supported by the OMNIKEY Reader product line.

### Crescendo C1100

- Smart Card solution for the ActivIdentity ActivID CMS (Software Version).
- Available with iCLASS, MIFARE Classic, MIFARE DESFire and Prox (HID or Indala) as multi-technology cards.

### Crescendo C1150

- Smart Card solution that includes a mini-driver for use with Microsoft CryptoAPI applications, as well as ActivIdentity ActivClient.
- Available with iCLASS, MIFARE Classic, MIFARE DESFire and Prox (HID or Indala) as multi-technology cards.
- Replace Crescendo C200

### iCLASS and iCLASS SE

Optimized to make physical access control more powerful, iCLASS 13.56 MHz read/write contactless smart card technology provides versatile interoperability and supports multiple applications such as biometric authentication, cashless vending and numerous other applications. iCLASS fully supports PC log on security as part of the HID's iCLASS on the Desktop solution.

## Prox

With over 200 million credentials in use around the world, HID is the market leader in contactless cards for access control. Our global reputation for delivering quality, value, partnership, and service excellence to our customers is unsurpassed in the security industry. For security managers, dealers, integrators and OEMs, HID Prox cards are recognized as the industry standard for physical access control. Featuring 125 kHz RFID technology HID Prox products are robust, affordable, and seamlessly integrate with access control systems. HID Prox cards fully support PC log on security as part of the HID's Prox on the Desktop solution.

## DisplayCard Platforms

The ActivID DisplayCard platform offers a highly secure converged solution for securing access to the cloud, data and the door – Suitable for corporate ID and secure online banking applications.

### DisplayCard

- Authenticator devices for logical access
- Available with optional contact chip Crescendo C1100 for ActivID CMS or Crescendo C1150 solution that includes a mini-driver for use with Microsoft CryptoAPI applications, as well as ActivID ActivClient.

### Contactless DisplayCard

- Authenticator devices for logical access
- Available with iCLASS, and Prox (HID or Indala) as multi-technology cards.
- As part of future feature, the Contactless DisplayCard product will support an optional contact chip Crescendo C1100 for ActivID CMS or Crescendo C1150 solution that includes a mini-driver for use with Microsoft CryptoAPI applications, as well as ActivID ActivClient.

## Readers

The OMNIKEY Smart Card Reader leverages HID industry-leadership in all forms of identity credentials to assist you in choosing the right smart card reader for your solution.

OMNIKEY Smart Card Readers are PC-connected readers for contact-based and contactless smart cards. OMNIKEY Smart Card Readers are available in various form factors (for example, desktop, laptop or mobile use), and connector type (for example, serial or USB). In addition, drivers are available for operating system support.

In addition to the standard products, OMNIKEY Smart Card Readers have a defined set of customization options (for example, customized housing colors, logo prints or labels). The customization options are described in this How To Order Guide.

## Basics of Ordering Cards

---

Each part number consists of a base number to indicate the type of credential, and a number or letter to indicate each credential option. Each credential has a standard part number which includes default options, as indicated on the attached credential guides. When an order is placed for a credential, the base number and all options must be specified. If you require any options that are different from the default options, you must indicate those options when placing the order. Complete all part numbers for HID's order entry system acceptance.

Include the following information for all orders.

### Reader Information

- BASE MODEL NUMBER
- STYLE
- READ RANGE
- TYPE
- COLOR
- OUTPUT FORMAT (reader's format or format number must also be given at time of order)

## Credential Information

**Base Part Number (all Credentials listed are delivered with Composite 40% Polyester / 60% PVC for long life applications)**

### iCLASS Capacity Size and Allocation

- 0 - 2k Bits (256 Bytes) with 2 Application Areas
- 1 - 16k Bits (2k Bytes) with 2 Application Areas
- 2 - 16k Bits (2k Bytes) with 16 Application Areas
- 3 - 32k Bits (4K Bytes) Application areas 16k/2+16k/1
- 4 - 32k Bits (4K Bytes) Application areas 16k/16+16k/1

### Programming

Programming indicates whether the credential is programmed at the HID factory by you with an HID iCLASS card programmer. If the credential is ordered non-programmed, an HID iCLASS card programmer must be used for programming. (Contact an HID sales representative for iCLASS card programmer eligibility).

### Second Contactless Technology Programming

- H** - HID Proximity (Specify Programming Information)
- E** - EM (Fixed Sequential Programming)
- T** - HITAG II (Programming not available)
- D** - Indala Proximity
- C** - Casi-Rusco Proximity (Fixed Sequential)
- F** - MIFARE DESFire (Specify Programming)
- M** - MIFARE (Specify Programming)

**MIFARE Capacity Size**

MIFARE 1K Bytes or 4K Bytes

**MIFARE DESFire EV1 Capacity Size**

8K Bytes

### Contact Chip and Embeddable Technology

- **Crescendo**  
Crescendo C1100 - For use with HID ActivID CMS: Software version  
Crescendo C1150 - For use with Microsoft Smart Card Base CSP and ActivIdentity ActivClient
- **Embeddable** - Must specify contact chip required. Consult your account manager for current availability and contact chip codes

**Front Packaging - Indicates standard or custom artwork and type of finish.**

**Back Packaging - Indicates standard or custom artwork and type of finish.**

**iCLASS Credential Numbering - Internal 13.56 MHz programmed number and visible external credential number.**

**Slot Punch**

**Optional 125 kHz Proximity or Wiegand Credential Numbering - Internal 125 kHz Proximity or Wiegand programmed number and visible external credential number.**

### Custom Artwork Credential Information

**Custom Artwork Number (Call your Customer Service Representative for a custom artwork number)**

### Credential Programming Information

- Bit Format(s)**
- Facility Code(s)**
- Internal and External Start Numbers**
- Internal PIN Code (Length: 2 – 12 Digits)**
- SIO® (Secure Identity Object) or Standard Programming**
- Any Special Instruction**

# Cards

## Contact and Contactless Combo Cards

Crescendo credentials are designed for combined physical and logical access control. The Crescendo card is made of highly durable composite plastic and includes the contactless and/or Prox technologies necessary to support your Physical Access Control Systems (PACS). Include Magnetic stripe technology and personalize Crescendo cards with a photo ID, barcode or anti-counterfeiting element. Ensure to check each option with the appropriate values to fulfill a completed order form.

### 401100 - Crescendo Ordering Guide

Base Model:  401100 - Crescendo C1100 – ActivIdentity ActivID CMS Software

Order minimum quantities of 25. Optionally, program the C1100 as an SR card (example, both SIO + Standard format for backwards compatibility).

**Contactless Technology (Check One). Call HID Customer Service if requiring other technologies.**

| <input type="checkbox"/> G - Multi-Tech 13.56 MHz MIFARE DESFire EV1 8KB and Prox - 125 kHz HID        | <input type="checkbox"/> Z - 13.56 MHz Seos 8 KB and 125 kHz Prox (HID, Indala, or Casi)              |

#### Option

- M - Standard Three Track High Coercivity Magstripe (ISO 7811-6)  
 S - SIM Punched card (only use "0" in the "Contactless Technology Section" in this case)

#### Option - Secure Identity Object Programming

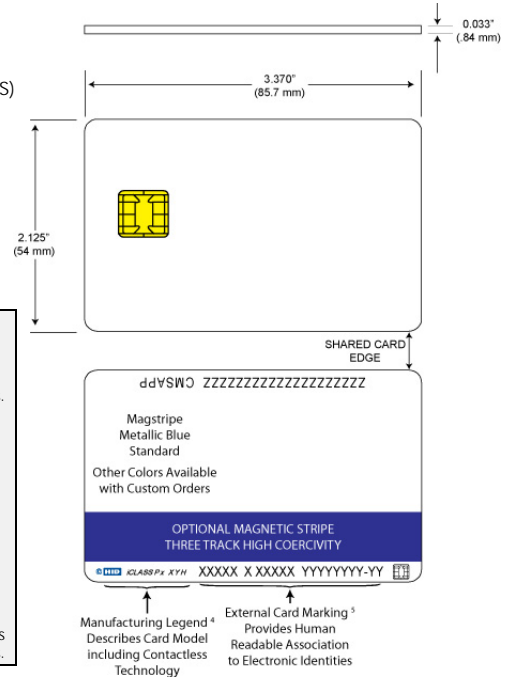

- H - Programmed with Security Identity Object (SIO): Dual Payload (Support SIO as well as Standard data format – only for iCLASS)  
 P - Programmed with Security Identity Object (SIO)

#### Option - Custom Artwork<sup>6</sup>

\_\_\_\_\_ (Specify Artwork Number – Refer to the Custom Artwork Forms for new artwork)

From the above options, enter your final card options. Examples: 4011000 (for card without magnetic stripe and no physical access technology) or 4011006M (for card with magnetic stripe and MIFARE DESFire EV1 8KB).

Final Part Number	401100				-	(Options)
-------------------	--------	--	--	--	---	-----------

#### Configuration and Programming (required for order)

##### External Marking Technology (Check One)

- Inkjet<sup>10</sup>  Laser<sup>8</sup>

##### iCLASS Memory Size and Allocation (Check One, if applicable)

- Not Applicable  
 32k Bits (4K Bytes) Application areas 16k/16+16k/1

##### Contactless Technology (Check One or more, if applicable)

##### iCLASS Programming

- Configured, Non-Programmed<sup>2</sup>  
 Programmed (Specify Programming)

##### MIFARE Classic or MIFARE DESFire EV1 Programming

- Programmed MIFARE (Specify HID Format, MIFARE only)  
 Non-Programmed<sup>2</sup>  
 Custom Programmed, Specify Programming Information<sup>3</sup>

Note: LEGIC interface is not programmed in this version.

##### Prox Programming

- Non-Programmed<sup>2</sup> 125 kHz Prox.  
 Programmed 125 kHz Prox. (Specify Programming)

- For information about HID ActivID CMS, visit <https://www.hidglobal.com/products/Cards-and-Credentials/Crescendo>.
- Non-programmed cards require field programming capability. Various solutions are available to securely program credentials.
- Any programming requiring custom keys or non-standard memory locations.
- The Manufacturing Legend is required on all cards.
- External Card Marking is used to trace manufacturing lots and provide readable serialization.
- Contact Customer Service for custom artwork number, lead times, and cost.
- Though most formats require two fields (site code and card number), use this area for additional values if required by the format.
- Laser marking may extend lead times.
- All Crescendo cards come with a blue magnetic stripe.
- Please note that cards shipped out of Austin, Texas are always laser-engraved. Inkjetted option is not available for these cards.

## 400 - Combo Contact and Contactless Ordering Guide

In most cases Crescendo credentials are the ideal combination of contact and contactless technologies. However, some legacy systems may require a specific contact chip. Consult your account manager for current availability and contact chip codes.

### Contactless Technology *(Check One)* Call HID Customer Service for other technologies

- 0 - None - Contact only card (No physical access)
- 2 - 13.56 MHz iCLASS 32 kb Only
- 4 - 13.56 MHz MIFARE Classic 4KB Only
- 6 - 13.56 MHz MIFARE DESFire EV1 8KB Only
- A - Multi-tech 13.56 MHz iCLASS 32 KB and 125 kHz Prox (HID, Indala, or Casi)
- C - Multi-tech 13.56 MHz MIFARE 4KB and 125 kHz Prox (HID, Indala, or Casi)
- G - Multi-tech 13.56 MHz MIFARE DESFire EV1 8KB and 125 kHz Prox (HID, Indala, or Casi)
- F - Multi-tech 13.56 MHz iCLASS 32KB and MIFARE 4KB
- H - Multi-tech 13.56 MHz iCLASS 32KB and MIFARE DESFire EV1 8KB
- J - Multi-tech 13.56 MHz iCLASS 32KB and MIFARE DESFire EV1 8KB and 125 kHz Prox (HID, Indala, or Casi)
- M - Combo 13.56 MHz LEGIC Prime 1024 and 125 kHz Prox (HID, Indala, or Casi)
- T - Multi-tech 13.56 MHz iCLASS 32KB and MIFARE 4KB and 125 kHz Prox (HID, Indala, or Casi)
- U - Multi-Tech 13.56 MHz MIFARE 4KB + MIFARE DESFire EV1 8K
- X - 13.56 MHz Seos 16 KB and 125 kHz Prox (HID, Indala, or Casi)

### Option – Magnetic Stripe

- M - Standard Three Track High Coercivity Magstripe (ISO 7811-6)

### Option – Secure Identity Object Programming

- H - Programmed with Security Identity Object (SIO): Dual Payload (Support SIO and Standard data format – Only for iCLASS)
- P - Programmed with SIO. **Mandatory option for Seos based cards.**
- S - SIM Punched card (only use "0" in the "Contactless Technology Section" in this case)

### Contact Technology

- XXX – Replace with the three character contact chip code provided by your account manager.

### Contact Chip Pre-Perso *(Check One)*

- B - Blank
- S - Operating system instantiated
- A - Applet loaded

### Option - Custom Artwork<sup>6</sup>

- \_\_\_\_\_ (Specify Artwork Number – Refer to the Custom Artwork Forms for new artwork)

Enter your final card options from check boxes above. Examples: 400A and 400TM

Final Part Number	400											(Options)
-------------------	-----	--	--	--	--	--	--	--	--	--	--	-----------

### Configuration and Programming (required for order)

#### External Marking Technology

- Inkjet<sup>9</sup>
- Laser<sup>9</sup>

#### iCLASS Memory Size and Allocation *(Check One)*

- Not Applicable (Use this when choosing MIFARE options 4 and C)
- 16k Bits (2k Bytes) with 2 Application Areas
- 32k Bits (4K Bytes) with 16 Application Areas
- 32k Bits (4K Bytes) Application areas 16k/2+16k/1
- 32k Bits (4K Bytes) Application areas 16k/16+16k/1

#### Contactless Technology *(Check One)*

##### iCLASS

- Not Applicable
- Configured, Non-Programmed<sup>2</sup>
- Programmed *(Specify Programming)*

##### MIFARE Classic

- Not Applicable
- Non-Programmed<sup>2</sup>
- Programmed MIFARE *(Specify HID Format, MIFARE only)*
- Custom Programmed, Specify Programming Information<sup>3</sup>
- Programmed MIFARE *(Specify HID Format, MIFARE only)*

##### MIFARE DESFire EV1 Classic

- Not Applicable
- Non-Programmed<sup>2</sup>
- Custom Programmed, Specify Programming Information

Note: LEGIC interface is not programmed in this version.

##### 125 kHz Prox

- Not Applicable
- Initialized, Non-Programmed<sup>2</sup>
- Programmed HID Prox
- Programmed Indala/Casi Prox
- Programmed Other Prox

Manufacturing Legend<sup>4</sup>  
Describes Card Model  
incl. Contactless Technology

External Card Marking<sup>5</sup>  
Provides Human Readable  
Association to Electronic Identities

<sup>1</sup> For information about MS CAPI and PKCS #11, visit <https://www.hidglobal.com/products/Cards-and-Credentials/Crescendo>.  
<sup>2</sup> Non-programmed cards require field programming capability. Various solutions are available to securely program credentials.  
<sup>3</sup> Any programming requiring custom keys or non-standard memory locations.  
<sup>4</sup> The Manufacturing Legend is required on all cards.  
<sup>5</sup> External Card Marking is used to trace manufacturing lots and provide readable serialization.  
<sup>6</sup> Contact Customer Service for custom artwork number, lead times, and cost.  
<sup>7</sup> Most formats require two fields (site code and card number); use this area for additional values if required.  
<sup>8</sup> Laser marking may extend lead times.  
<sup>9</sup> Please note that cards shipped out of Austin, Texas are always laser-engraved. Inkjetted option is not available for these cards.

## 1597 - Smart ISOProx® II Card Ordering Form

Ensure each required option has been checked with the appropriate choice to fulfill a completed order form.

Base Model  1597 Composite 40% Polyester / PVC \*

### Programming (Check One)

- L - Programmed, Low Frequency (125 kHz). Specify Programming Information.
- C - Programmed, Low Frequency (125 kHz) Casi-Rusco<sup>6</sup> (Identified on Ink jet Markings) Specify Programming Information.
- N - Non-Programmed, Low Frequency (125 kHz). Programming Information Not Required.

### Front Packaging (Check One)

- G - Plain White with Gloss Finish
- C - Custom Artwork with Gloss Finish – Specify Custom Artwork Number<sup>1</sup>

### Back Packaging (Check One)

- G - Plain White PVC with Gloss Finish<sup>2</sup>
- S - Standard Smart ISOProx II Artwork (shown)<sup>2</sup>
- C - Custom Artwork with Gloss Finish – Specify Custom Artwork Number<sup>1, 2</sup>

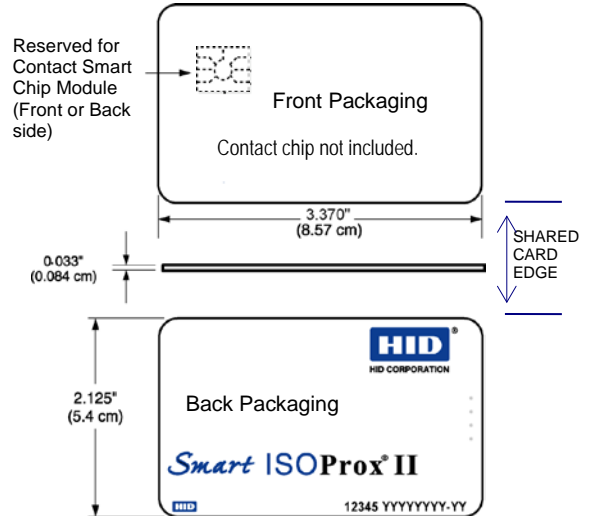

### Card Numbering<sup>3</sup> (Check One)

- M - Sequential Matching Internal/External (Inkjetted)<sup>7</sup>
- N - No External Card Numbering
- S - Sequential Internal/Sequential Non-Matching External (Inkjetted)<sup>7</sup>
- R - Random Internal/Non-Matching Sequential External (Inkjetted)<sup>7</sup>
- A - Sequential Matching Internal/External (Engraved)<sup>4</sup>
- B - Sequential Internal/Sequential Non-Matching External (Engraved)<sup>4</sup>
- C - Random Internal/Non-Matching Sequential External (Engraved)<sup>4</sup>

### Slot Punch<sup>5</sup> (Check One)

- N - No Slot Punch (Printed location of vertical slot punch will remain)
- V - Vertical Slot Punch

12345 = Card ID Number  
YYYYYYYY-YY = Sales Order Number

For a list of embeddable modules, contact your Regional Sales Representative.

### Option - Custom Artwork<sup>1</sup>

\_\_\_\_\_ (Specify Artwork Number – Refer to the Custom Artwork Forms for new Artwork)

Enter your final card options from check boxes above. Example: 1397LGGMN

Final Part Number	1597							-	(Options #)
-------------------	------	--	--	--	--	--	--	---	-------------

### 125 kHz Card Programming Information

Bit Numbers \_\_\_\_\_ (example: 26 bit) Format Number \_\_\_\_\_ (example: H10301)

Facility Code \_\_\_\_\_

(Custom Formats) Site Code \_\_\_\_\_ City Code \_\_\_\_\_ OEM Code \_\_\_\_\_

Internal Card No. Start \_\_\_\_\_ Stop \_\_\_\_\_

External Card No. Start \_\_\_\_\_ Stop \_\_\_\_\_

Special Instructions: \_\_\_\_\_

For Contact Smart Chip selection, contact your Regional Sales Representative. Standard configuration does not include a contact smart chip module.

<sup>1</sup> For new artwork files, contact Customer Service for custom artwork number, lead times and cost.  
<sup>2</sup> Cards ordered with plain white front and back packaging, with no HID artwork or with custom artwork, will still have a small HID logo and reference number printed in the lower left-hand corner and a slot punch target printed on the back of the card.  
<sup>3</sup> The external card number is placed in the bottom right-hand corner on the back of the card.  
<sup>4</sup> For Laser Engraved external numbers, consult factory for lead times and cost.  
<sup>5</sup> Cards are provided with an optional vertical slot punch at no additional charge. Some video imaging printers cannot accommodate pre-slot punched cards. Consult with the printer manufacturer prior to ordering.  
<sup>6</sup> Programmed as a sequential 12 digit number.  
<sup>7</sup> Please note that cards shipped out of North America are always laser-engraved. Inkjetted option is not available for these cards.  
\* The composite construction is recommended for all cards that will have an over-laminate applied.

### 1598 - Smart DuoProx® II Card Ordering Form

Ensure each required option has been checked with the appropriate choice to fulfill a completed order form.

**Base Model**  1598 Composite 40% Polyester / PVC\*

#### Programming (Check One)

<sup>6</sup> Please note that cards shipped out of North America are always laser-engraved. Inkjetted option is not available for these cards.  
 \* The composite construction is recommended for all cards that will have an over-laminate applied.

### 243 - Combination Dual HF (iCLASS / Other HF) Embeddable Ordering Guide

The iCLASS with MIFARE or MIFARE DESFire embeddable smart card offers multiple High Frequency technologies to simplify card issuance for diverse systems or migration projects. Add new applications while leveraging your investment in existing access control systems. Personalize the card with a photo ID, magnetic stripe, barcode, or anti-counterfeiting element.

Ensure each required option has been checked with the appropriate choice to fulfill a completed order form.

Base Model  243 Composite 40% Polyester / PVC \*

#### iCLASS Memory Size and Allocation (Check One)

- 0 - 2k Bits (256 Bytes) with 2 Application Areas (only available with MIFARE CLASSIC 1K)
- 3 - 32k Bits (4K Bytes) Application areas 16k/2+16k/1
- 4 - 32k Bits (4K Bytes) Application areas 16k/16+16k/1

#### Card Programming (Check One)

- B - Programmed iCLASS & 2<sup>nd</sup> Technology. Specify Programming Information.
- P - Programmed iCLASS only not 2<sup>nd</sup> Technology. Specify Programming Information.
- C - Configured, Non-Programmed iCLASS. Non-programmed 2<sup>nd</sup> Technology. Programming Information Not Required.
- A - Configured, Non-Programmed iCLASS, Programmed 2<sup>nd</sup> Technology. Specify Programming Information.

#### 2<sup>nd</sup> High Frequency Technology (Check One)

- M - MIFARE Classic 1K Bytes (only available with iCLASS 2k bits)
- N - MIFARE 4K Bytes
- K - MIFARE DESFire EV1 8K Bytes

#### Front Packaging (Check One)

- G - Plain White with Gloss Finish
- C - Custom Artwork with Gloss Finish – Specify Custom Artwork Number<sup>1</sup>

#### Back Packaging (Check One)

- G - Plain White with Gloss Finish<sup>2</sup>
- C - Custom Artwork with Gloss Finish – Specify Custom Artwork Number<sup>1</sup>
- 1 - Plain White with Gloss Finish with Magnetic Stripe<sup>2</sup>
- 3 - Custom Artwork with Gloss Finish with Magnetic Stripe - Specify Custom Artwork Number<sup>1</sup>

#### iCLASS Card Numbering<sup>3</sup> (Check One)

- M - Sequential Matching Internal/External (Inkjetted)<sup>5</sup>
- N - No External Card Numbering
- S - Sequential Internal/Sequential Non-Matching External (Inkjetted)<sup>5</sup>
- R - Random Internal/Non-Matching Sequential External (Inkjetted)<sup>5</sup>
- A - Sequential Matching Internal/External (Laser Engraved)<sup>4</sup>
- B - Sequential Internal/Sequential Non-Matching External (Laser Engraved)<sup>4</sup>
- C - Random Internal/Non-Matching Sequential External (Laser Engraved)<sup>4</sup>

#### Slot Punch

**IMPORTANT:** Dual High Frequency credentials do not allow a slot punch due to the antenna design. HID recommends using a badge holder to attach this card to a lanyard or badge clip.

- N - No Slot Punch

#### 2<sup>nd</sup> High Frequency Technology Card Numbering<sup>3</sup> (Check One)

- M - Sequential Matching Internal/External (Inkjetted)
- N - No External Card Numbering
- S - Sequential Internal/Sequential Non-Matching External (Inkjetted)
- R - Random Internal/Non-Matching Sequential External (Inkjetted)
- A - Sequential Matching Internal/External (Laser Engraved)<sup>4</sup>
- B - Sequential Internal/Sequential Non-Matching External (Laser Engraved)<sup>4</sup>
- C - Random Internal/Non-Matching Sequential External (Laser Engraved)<sup>4</sup>

For a list of embeddable modules, contact your Regional Sales Representative.

#### Option - Custom Artwork<sup>1</sup>

- \_\_\_\_\_ (Specify Artwork Number – Refer to the Custom Artwork Forms for new artwork)

Enter your final card options from the above selections. Example: 2434PNGGNNN

Final Part Number	243								N		-	(Options #)
-------------------	-----	--	--	--	--	--	--	--	---	--	---	-------------

#### MIFARE DESFire 13.56 MHz Programming Information

Bit Numbers \_\_\_\_\_ (example: 26 bit)  
 Format Number \_\_\_\_\_ (example: H10301)  
 Facility Code \_\_\_\_\_  
 (Custom Formats) Site Code \_\_\_\_\_, City Code \_\_\_\_\_, OEM Code \_\_\_\_\_  
 Internal Card No. Start \_\_\_\_\_, Stop \_\_\_\_\_  
 External Card No. Start \_\_\_\_\_, Stop \_\_\_\_\_  
 Special Instructions: \_\_\_\_\_

<sup>1</sup> For new artwork files, contact Customer Service for custom artwork number, lead times, and cost.  
<sup>2</sup> Cards ordered with plain white front and back packaging, or custom artwork, will have a small HID logo reference number (lower left corner) and a slot punch target printed on the back of the card.  
<sup>3</sup> The external card number on the card back is placed in the bottom right corner for MIFARE 13.56 MHz and in the bottom center for MIFARE DESFire.  
<sup>4</sup> For Laser Engraved external numbers, consult factory for lead times and cost.  
<sup>5</sup> Cards are provided with an optional slot punch at no additional charge. Some video imaging printers cannot accommodate pre-slot punched cards.  
<sup>6</sup> Please note that cards shipped out of North America are always laser-engraved. Inkjetted option is not available for these cards.  
<sup>\*</sup> The composite construction is recommended for all cards with over-laminate applied. Consult with the printer manufacturer prior to ordering.

**125 kHz Card Programming Information**

---

Bit Numbers \_\_\_\_\_ (example: 26 bit)

Format Number \_\_\_\_\_ (example: H10301)

Facility Code \_\_\_\_\_

(Custom Formats) Site Code \_\_\_\_\_ City Code \_\_\_\_\_ OEM Code \_\_\_\_\_

Internal Card No. Start \_\_\_\_\_ Stop \_\_\_\_\_

External Card No. Start \_\_\_\_\_ Stop \_\_\_\_\_

Special Instructions: \_\_\_\_\_.

<sup>1</sup> For new artwork files, contact Customer Service for custom artwork number, lead-times, and cost.

<sup>2</sup> Cards ordered with plain white front and back packaging, or custom artwork, will still have a small "HID logo"  and reference number printed in the lower left-hand corner and a slot punch target printed on the back of the card.

<sup>3</sup> The external card number is placed in the bottom right-hand corner on the back of the card.

<sup>4</sup> For Laser Engraved external numbers, consult factory for lead times and cost.

<sup>5</sup> Cards are provided with an optional slot punch at no additional charge. Some video imaging printers cannot accommodate pre-slot punched cards.

<sup>6</sup> The ability to add a horizontal slot punch requires a different iCLASS antenna design. Users can expect a read range reduction of approximately 20% if they order options B or H for the Slot Punch.

<sup>6</sup> Please note that cards shipped out of North America are always laser-engraved. Inkjetted option is not available for these card.

<sup>\*</sup> The composite construction is recommended for all cards with over-laminate applied. Consult with the printer manufacturer prior to ordering.

### 392 - iCLASS SE / Other HF - Embeddable Card Ordering Guide

The SIO-Enabled iCLASS with MIFARE or MIFARE DESFire embeddable smart card offers multiple High Frequency technologies to simplify card issuance for diverse systems or migration projects. Add new applications while leveraging your investment in existing access control systems. Personalize the card with a photo ID, magnetic stripe, barcode, or anti-counterfeiting element. This card offers maximized compatibility with added security into installations that do not contain standard iCLASS or MIFARE/MIFARE DESFire credentials.

For MIFARE DESFire, this card is only made available with MIFARE DESFire EV1 (not DESFire 0.6).

This card is SIO only, it is not loaded with standard data payload and for this reason is not compatible with non iCLASS SE readers.

Ensure each required option has been checked with the appropriate choice to fulfill a completed order form.

**Base Model**  **392 Composite 40% Polyester / PVC \***

#### iCLASS Memory Size and Allocation (Check One)

- 0 - 2k Bits (256 Bytes) with 2 Application Areas (only available with MIFARE CLASSIC 1K)
- 3 - 32k Bits (4K Bytes) Application areas 16k/2+16k/1
- 4 - 32k Bits (4K Bytes) Application areas 16k/16+16k/1

#### Card Programming (Check One)

- R - SIO Programmed iCLASS & 2<sup>nd</sup> Technology. Specify Programming Information
- P - Programmed iCLASS with SIO only not 2<sup>nd</sup> Technology. Specify Programming Information.
- A - Configured, Non-Programmed iCLASS, SIO Programmed 2<sup>nd</sup> Technology. Specify Programming Information.

#### 2<sup>nd</sup> High Frequency Technology (Check One)

- M - MIFARE 1K Bytes (only available with iCLASS 2k bits)
- N - MIFARE 4K Bytes
- K - MIFARE DESFire EV1 8K Bytes

#### Front Packaging (Check One)

- G - Plain White with Gloss Finish
- C - Custom Artwork with Gloss Finish – Specify Custom Artwork Number<sup>1</sup>

#### Back Packaging (Check One)

- G - Plain White with Gloss Finish<sup>2</sup>
- C - Custom Artwork with Gloss Finish – Specify Custom Artwork Number<sup>1</sup>
- 1 - Plain White with Gloss Finish with Magnetic Stripe<sup>2</sup>
- 3 - Custom Artwork with Gloss Finish with Magnetic Stripe - Specify Custom Artwork Number<sup>1</sup>

#### iCLASS Card Numbering<sup>3</sup> (Check One)

- M - Sequential Matching Internal/External (Inkjetted)<sup>7</sup>
- N - No External Card Numbering
- S - Sequential Internal/Sequential Non-Matching External (Inkjetted)<sup>7</sup>
- R - Random Internal/Non-Matching Sequential External (Inkjetted)<sup>7</sup>
- A - Sequential Matching Internal/External (Laser Engraved)<sup>4</sup>
- B - Sequential Internal/Sequential Non-Matching External (Laser Engraved)<sup>4</sup>
- C - Random Internal/Non-Matching Sequential External (Laser Engraved)<sup>4</sup>

#### Slot Punch

**IMPORTANT** – Dual High Frequency credentials do not allow a slot punch due to the antenna design. Use a badge holder to attach this card to a lanyard or badge clip.

- N - No Slot Punch

#### 2<sup>nd</sup> High Frequency Technology Card Numbering<sup>3</sup> (Check One)

- M - Sequential Matching Internal/External (Inkjetted)<sup>7</sup>
- N - No External Card Numbering
- S - Sequential Internal/Sequential Non-Matching External (Inkjetted)<sup>7</sup>
- R - Random Internal/Non-Matching Sequential External (Inkjetted)<sup>7</sup>
- A - Sequential Matching Internal/External (Laser Engraved)<sup>4</sup>
- B - Sequential Internal/Sequential Non-Matching External (Laser Engraved)<sup>4</sup>
- C - Random Internal/Non-Matching Sequential External (Laser Engraved)<sup>4</sup>
- W - UID (CSN) HEX numbering only (Engraved)<sup>4</sup>: 7 bytes UID<sup>5</sup>
- X - UID (CSN) Decimal numbering only (Engraved)<sup>4</sup>: 7 bytes UID<sup>5</sup>

#### Option - Custom Artwork<sup>1</sup>

- \_\_\_\_\_ (Specify Artwork Number – Refer to the Custom Artwork Forms for new artwork)

Enter your final card options from the above selections. Example: 3924PNGCMNN

<b>Final Part Number</b>	<b>392</b>							<b>N</b>		<b>-</b>	<b>(Options #)</b>

<sup>1</sup> For new artwork files, contact Customer Service for custom artwork number, lead times, and cost.  
<sup>2</sup> Cards ordered with plain white front and back packaging, with no HID artwork or with custom artwork, will still have a small HID logo and reference number printed in the lower left-hand corner and a slot punch target printed on the back of the card.  
<sup>3</sup> The external card number is placed in the bottom left-hand corner (125 kHz) and in the bottom right-hand corner (13.56 MHz) on the back of the card on Prox Programming only. Permanent unique MIFARE 56 Bit serial # cannot be printed on cards.  
<sup>4</sup> For Laser Engraved external numbers, consult factory for lead times and cost.  
<sup>5</sup> Cards are provided with an optional slot punch at no additional charge. Some video imaging printers cannot accommodate pre-slot punched cards. Consult with the printer manufacturer prior to ordering.  
<sup>6</sup> Includes a permanent Unique MIFARE 56 Bit Serial number.  
<sup>7</sup> Please note that cards shipped out of North America are always laser-engraved. Inkjetted option is not available for these card.  
 \* The composite construction is recommended for all cards with over-laminate applied.

### 501 - iCLASS Seos Embeddable Card Ordering Guide

Increased security and interoperability cards for installation supporting iCLASS SE platform.  
Ensure each required option has been checked with the appropriate choice to fulfill a completed order form.

Base Model  501 Composite 40% Polyester / PVC 60%

**iCLASS Memory Size and Allocation**

- 5 - 16K Bytes
- 6 - 8K Bytes

**Secure Identity Object Programming**

- P - Programmed with Security Identity Object (SIO)

**Front Packaging (Check One)**

- G - Plain White with Gloss Finish
- C - Custom Artwork with Gloss Finish – Specify Custom Artwork Number<sup>1</sup>

**Back Packaging (Check One)**

- G - Plain White with Gloss Finish<sup>2</sup>
- C - Custom Artwork with Gloss Finish – Specify Custom Artwork Number<sup>1</sup>
- 1 - Plain White with Gloss Finish with Magnetic Stripe<sup>2</sup>
- 3 - Custom Artwork with Gloss Finish with Magnetic Stripe - Specify Custom Artwork Number<sup>1</sup>

**Card Numbering<sup>3</sup> (Check One)**

- M - Sequential Matching Internal/External (Inkjetted)<sup>5</sup>
- N - No External Card Numbering
- S - Sequential Internal/Sequential Non-Matching External (Inkjetted)<sup>5</sup>
- R - Random Internal/Non-Matching Sequential External (Inkjetted)<sup>5</sup>
- A - Sequential Matching Internal/External (Laser Engraved)<sup>4</sup>
- B - Sequential Internal/Sequential Non-Matching External (Laser Engraved)<sup>4</sup>
- C - Random Internal/Non-Matching Sequential External (Laser Engraved)<sup>4</sup>

**Slot Punch**

- N - No Slot Punch

**Option - Custom Artwork<sup>1</sup>**

- (Specify Artwork Number – Refer to the Custom Artwork Forms for new artwork)

Optional  
Contact Smart  
Chip Module  
(Front or Back side)

<sup>1</sup> For new artwork files, contact Customer Service for custom artwork number, lead-times, and cost.  
<sup>2</sup> Cards ordered with plain white front and back packaging, or custom artwork, will still have a small HID logo and reference number printed in the lower left-hand corner and a slot punch target printed on the back of the card.  
<sup>3</sup> The external card number is placed in the bottom right-hand corner on the back of the card.  
<sup>4</sup> For Laser Engraved external numbers, consult factory for lead times and cost.  
<sup>5</sup> Please note that cards shipped out of North America are always laser-engraved. Inkjetted option is not available for these card.

## Card Packages

### iCLASS / Prox Combo Cards (for iCLASS or Prox on the Desktop) 2124BG3MNN-10PAK iCLASS 32K (16K/16 + 16K/1) and HID Prox

Use *iCLASS / Prox / mag* combination cards to test both *Prox on the Desktop* and *iCLASS on the Desktop* solutions. These cards are pre-programmed with an HID 26 bit format and printed on one-side. The front side is left blank and suitable for dye sublimation imaging, if desired.

### Crescendo (for Crescendo on the Desktop)

Use Contact Chip / Prox / (iCLASS or MIFARE) / mag combination cards to test all HID on the Desktop solutions. While they are primarily offered to test Crescendo on the Desktop, you can use these cards to test Prox on the Desktop and iCLASS on the Desktop. These cards are pre-programmed with an HID 26 bit format and printed on one-side. The front side is left blank and suitable for dye sublimation imaging, if desired.

**Note:** To test iCLASS on the Desktop with a Crescendo card, you must order one of the two models that contain the iCLASS technology.

# DisplayCard Platforms

DisplayCard platforms are designed for combined physical and logical access control. The self-powered DisplayCard is equipped with a high contrast 6-digits LCD and an activation button that allows generating a One Time password. The smart card is able to include contactless options iCLASS and Prox to support your existing physical access control.

Ensure to check each option with the appropriate values to fulfill a completed order form.

## DisplayCard

Base Model:  BDC1XX00HID100 – PVC<sup>4</sup> Single Button DisplayCard for OTP Generation  
 Order minimum quantities of 100.

### Front and Back Packaging (Check One)

- 1 - HID branded
- 3 - Custom Artwork – Specify Custom Artwork Number<sup>1</sup>

### Contact Chip<sup>2</sup>

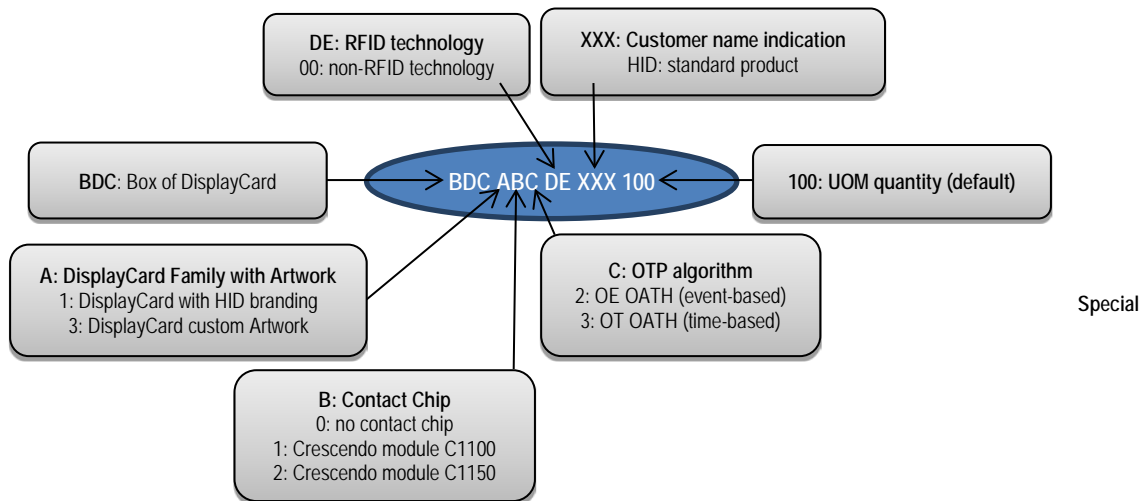

- 0 - No contact chip
- 1 - Crescendo contact Chip C1100
- 2 - Crescendo contact Chip C1150

### Algorithm for One Time Password

- 2 - OATH Event-based (HOTP)
- 3 - OATH Time-based (TOTP)<sup>2</sup>

Enter your final card options from check boxes above. Example:  
 BDC10200HID100 (HID branded DisplayCard – HOTP algorithm)

<b>Final Part Number</b>	<b>BDC</b>	<b>1</b>	<b>0</b>	<b>2</b>	<b>00</b>	<b>HID</b>	<b>100</b>
--------------------------	------------	----------	----------	----------	-----------	------------	------------

Instructions: \_\_\_\_\_

<sup>1</sup> For new artwork files, contact Customer Service for artwork form, lead-times, and cost.  
<sup>2</sup> This option involves customization fees and Minimum Order Quantity – Contact Customer Service for lead-times and cost.<sup>4</sup> The PVC card does not support HDP Printers

## Contactless DisplayCard

Base Model:  BDC200XXHID100 – Composite Plain White DisplayCard Single Button with iCLASS and Prox  
 Order minimum quantities of 100.

### Front and Back Packaging (Check One)<sup>3</sup>

- 1 - HID branded
- 2 - Plain White (HDP5000 and HDP8500 supported)<sup>2</sup>
- 3 - Custom Artwork – Specify Custom Artwork Number<sup>1</sup>

### Option: Contact Chip

- 0 - No contact chip

### Algorithm for One Time Password

- 2 - OATH Event-based (HOTP)

### iCLASS Type and Memory Size and Allocation

- 10 - iCLASS SE 2k Bits (256 Bytes) with 2 Application Areas

### Option – Secure Identity Object Programming

- H - Programmed with Security Identity Object (SIO)

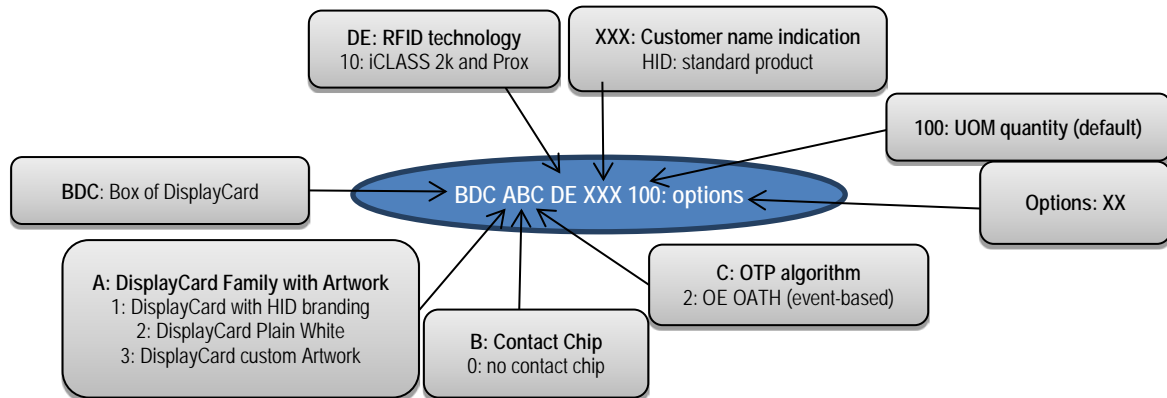

### Combo iCLASS and Prox

- P - Programmed iCLASS only and Prox initialized. (Specify Programming)
- B - Programmed 125 kHz Proximity and iCLASS. (Specify Programming)

Y = iCLASS Programming – HID-12345678: Card number  
 YYYYYYYY-YY = Sales Order Number

Enter your final card options from check boxes above. Example: BDC20010HID100:HB (White DisplayCard-Oath Event-based algorithm with iCLASS 2K and Prox contactless technology and programmed with dual payload card)

<b>Final Part Number</b>	<b>BDC</b>	<b>2</b>	<b>0</b>	<b>2</b>	<b>10</b>	<b>HID</b>	<b>100</b>	<b>-</b>	<b>H</b>	<b>(Options #)</b>

Special Instructions: \_\_\_\_\_

<sup>1</sup> For new artwork files, contact Customer Service for artwork form, lead-times, and cost.  
<sup>2</sup> Cards ordered with plain white front and back packaging, or custom artwork, will still have reference number.  
<sup>3</sup> The Manufacturing Legend is required on all cards. External Card Marking is used to trace manufacturing lots and provide readable serialization  
<sup>4</sup> This option involves customization fees and Minimum Order Quantity – Contact Customer Service for lead-times and cost.

<sup>5</sup> Though most formats require two fields (site code and card number), use this area for additional values if required by the format.

## Desktop Smart Card Readers

### Reader Ordering Guide

Each OMNIKEY Smart Card Reader has a unique part number. These numbers as listed below and always represent the standard product. Customized products will receive an individual part number upon confirmation of the order. All part numbers must be complete for acceptance by THE HID Global order entry system.

Due to organizational changes, product improvements, and firmware changes, part numbers of OMNIKEY Smart Card Readers can be subject to change.

The following ordering is available for OMNIKEY Readers.

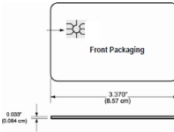

\* **TAA** - TAA stands for Trade Agreements Act of 1979. The TAA is an Act of Congress that governs trade agreements negotiated between the United States and other countries. Provided is a list of countries in which United States institutions may purchase devices.

- 1 - HID ISOPROX II Card

## OMNIKEY Customization Program

HID offers a number of standard customizations for its OMNIKEY Smart Card Readers. The following standard customization options exist.

### Standard Customization Options

- Landing Contacts** – Replace the sliding contacts unit (default) with landing contacts
- No Logo** - no HID Logo on reader
- Logo** - Alternative Logo on the reader
- Housing** - Alternative housing color
- Label** - Alternative product label
- Cable** - Alternative Length

#### The following rules apply to all standard customizations:

- Minimum Order Quantities (MOQ) may apply (depending on the requested customization)
- Addition costs for setup (NRE) and per unit may apply
- Additional Sign-off processes may be required (for example, special artwork and samples)
- Lead time increases (due to additional approval and production procedures)

### OMNIKEY Order Form for Standard Customization Requests

This form, accompanied with the Custom Artwork files, **MUST** be filled out, **SIGNED** and returned to HID so that your order can be processed.

Full HID Part Number to be customized: \_\_\_\_\_  
 Base Product Name: \_\_\_\_\_  
 Quantity: \_\_\_\_\_  
 Desired Delivery Date: \_\_\_\_\_  
 HID Sales Manager: \_\_\_\_\_

**Customer Contact Information (for Customization Approval & Artwork Sign Off)**

 \_\_\_\_\_

**Customization Options:**

For a full list including non-standard customization options available for the HID OMNIKEY Smart Card Readers, contact your Sales Manager. See the availability of customizations per OMNIKEY reader in Table 1 - OMNIKEY Smart Card Readers (column Customization Options).

**Landing Contact Unit.** No additional information required.

Customization option available for 3121 and 3111 reader family.  
MOQ is 500 pcs.

**Neutral** – No HID Logo. No additional information required.

Customization option is available for all readers except: 4040, 4121, 4321, 2061 and 3921 reader families.  
MOQ is 500 pcs.

**Logo Printing** – Alternative Reader Logo. Complete all fields.  
 Housing part to customize (e.g. cap, main body): \_\_\_\_\_  
 Color Codes in Pantone for all colors used in logo: \_\_\_\_\_  
 For all text elements- font style, size, position & color: \_\_\_\_\_  
 Attached custom artwork file name & format (e.g. PDF, AI, JPG): \_\_\_\_\_  
 Resolution must be at least 600 dpi.  
 Logo positioning (description / attached drawings file): \_\_\_\_\_

Customization option is available for all readers except 4040, 4121, 4321, 5321 CR, 2061 and 3921 reader families.  
MOQ is 500 pcs.

**Housing** – Alternative Housing Color. Complete all fields.  
 Housing part to customize (e.g. cap, main body): \_\_\_\_\_  
 Color Code(s) in Pantone Plastic: \_\_\_\_\_

Customization option is available for all readers except 4040, 4121, 4321, 2061 and 5321 CR readers.  
MOQ is 5.000 pcs.

**Labeling** – Alternative Product Label. Complete all fields.  
 Attached custom artwork file name & format (e.g. PDF, AI, JPG): \_\_\_\_\_  
 Resolution must be at least 600 dpi.  
 Color Codes & coding system for all colors in label: \_\_\_\_\_

Customization option available for the *top* label of 4040, 4121 and 4321 reader families.  
MOQ is 500 pcs.

**Cable** - Alternative Cable Length. Complete all fields.  
 Desired cable length in centimeters (cm): \_\_\_\_\_

Customization option available for all readers except 2061, 4040, 4121, 4321, 3621, 3821 and 6x21 reader families.  
MOQ is 5.000 pcs.

**Additional Comments (optional)**

Add further comments for your customization request as necessary.

# Appendix

## Custom Cards

### Artwork Checklist

Company Name: \_\_\_\_\_ PO No.: \_\_\_\_\_ Date: \_\_\_\_\_  
 Quantity: \_\_\_\_\_ Card Artwork File No.: \_\_\_\_\_  
 Minimum order quantity for Custom Artwork is 500 cards per order. Some Custom Artworks may be higher.

This form, accompanied with the Custom Artwork placement and Inkjet Location Form **MUST** be filled out, **SIGNED** and returned to HID so that your order can be processed.

Credential Type: Composite PVC/Polyester<sup>1</sup> Cards (Additional fee and longer lead time)

- |   |   |
|---|---|
| <input type="checkbox"/> 402/407 Crescendo Card       | <input type="checkbox"/> 400 Combo Contact/Contactless Card |
| <input type="checkbox"/> 1597 Smart ISOProx II Card   | <input type="checkbox"/> 1598 Smart DuoProx II Card         |
| <input type="checkbox"/> 211 - iCLASS Embeddable Card | <input type="checkbox"/> 213 - iCLASS Prox embeddable Card  |

| <input type="checkbox"/> 1456 - MIFARE DESFire        | <input type="checkbox"/> 1457 - MIFARE DESFire and Prox     |

#### Artwork Placement, Font Styles and Colors:

Artwork Placement on Front Side of card  
 Artwork Placement on Back Side of card  
 Font Style(s): \_\_\_\_\_  
 Front Side Colors: \_\_\_\_\_  
 Back Side Colors: \_\_\_\_\_  
 Do you plan to print over or around the custom artwork with a dye sublimation printer?  Yes  No  
 Surface  or Laminated  Lithographic Printing (Refer to the Anti-Counterfeiting Descriptions page in this guide for details)

#### Card Options:

Slot Punch <sup>2,5</sup>:  Yes  No  Horizontal  Vertical  
 Signature Panel:  Yes  No Size: \_\_\_\_\_  
 Front Card Finish:  Gloss  
 Back Card Finish:  Gloss  
 Magnetic Stripe Coercivity:  High (ISO7811-6)  Low (ISO 7811-2)  
 Magnetic Stripe Type:  Standard 3 Track  Debitek 1/8 inch  Other: \_\_\_\_\_

#### Anti-Counterfeiting Options:

Invisible Ink:  Red  Yellow  Blue  Green  Glow in the Dark  
 Micro-fine Print:  Yes  No  
 Hologram <sup>7</sup>:  Surface  Embedded

#### Notes:

<sup>1</sup> Standard Composite Card is 25% Polyester and 75% PVC. A .035 inch thick card with 35% Polyester is also available. Contact Customer Service for details.  
<sup>2</sup> Some cards will have printed indicators on the back of the card to show the vertical slot punch location.  
<sup>3</sup> Some cards will have a small HID logo and reference number, custom artwork file number, and external number (optional) printed on the card.  
<sup>4</sup> Do not order slot punched cards for use in dye sublimation printers. Slot edge may damage the printer ribbon. Slot should be punched after dye sublimation printing.  
<sup>5</sup> Some video imaging printers cannot accommodate pre-slot punched cards. Consult with the printer manufacturer prior to ordering.  
<sup>6</sup> Surface Holograms cannot be placed over internal electronics.  
<sup>7</sup> Representation, Warranty and Indemnity. Customer represents and warrants to HID that it owns, controls, or otherwise has the full and unrestricted right to use the custom artwork provided to HID for use in connection with this Custom Artwork Checklist Form (the Custom Artwork) and to authorize and license HID to use and apply the Custom Artwork to the cards in the manner provided in this Custom Artwork Checklist Form. Customer agrees to indemnify HID and hold it harmless from and against any claims, liabilities, losses and/or expenses (including reasonable attorney fees and costs of suit) arising out of the use by HID of the Custom Artwork in the manner provided by this Custom Artwork Checklist Form or by any custom artwork proofs approved by the Customer.  
<sup>8</sup> HID does not recommend placing custom graphics on either side of the Contact Smart Chip area.

## Electronic Artwork Checklist

### File Submission and Preparation

This document gives digital artwork specifications from our press department. Use these guidelines and your project should go smoothly through the pre-press department.

MEDIA

Submit files through email or on CD. Compressed files should be self-extracting. Submitted media will not be returned to the customer. An FTP address is available upon request for submitting media.

PLATFORM: MS WINDOWS/Macintosh

Projects that are set up in any of the major applications (listed below under Graphic Applications) generally translate to Macintosh smoothly. **Save your final file with pictures embedded, outlined fonts and EPS Vector editable file.**

FONTS

Use Type 1 fonts and include screen and printer fonts on disk. Type may be converted to paths or outlines, but we cannot make copy changes to text submitted in this form. In addition, converted type loses the benefits of PostScript font definitions; hence, type quality may suffer. This is more noticeable in small type (-18 point).

PLACED GRAPHICS

All placed graphics, saved as TIFF or EPS, and should be included in their native program. If an Adobe Photoshop® image is placed in a QuarkXPress® document, we need the Photoshop image to produce the job. Sizing, cropping, rotation, etc. should all be done to the element in its native program and placed in Quark. Color images should be converted from RGB to CMYK. Special colors should be designated using PMS or provide color sample to be matched. Resolution of color images, BandW halftones, or duotones should be 300 Dots Per Inch (dpi).

GRAPHIC APPLICATIONS (latest version)

Adobe Photoshop - Adobe Illustrator® - QuarkXPress

BITMAPS AND TRACING

Scanned line art converted to bitmaps should have a resolution of 1200 - 2400 dpi. Lower resolutions will result in jagged curves. Many programs can convert (trace) bitmaps to vector drawings. Smoothing a traced image can be time consuming, but once completed yields a resolution independent graphic that will provide crisp reproduction for all future uses. We can provide this service for you at our regular file intervention rate. Minimum required dpi is 300.

BLEEDS

Incorporate 0.125 inch of overwork for all bleed images. Any portion of the image that extends to the edge of the product is considered a bleed. Minimum required size with bleed is 2.227 x 3.477 inch for standard card size file.

MARGINS

Elements that do not bleed should be at least 0.125 inch from the edge.

## Anti-Counterfeiting Descriptions

### Printing Types

**Laminated Lithographic Printing:** High resolution (>3600 dpi) offset printing technology yields photographic quality images. Laminated printing places the ink layer under a rigid clear plastic overlay which protects the printed image from abrasion and allows you to re-print over the existing artwork on the card. The cards are compatible with all Photo ID printing methods: dye-sublimation, reverse transfer and resin transfer.

**Surface Lithographic Printing:** This process is identical to the Laminated Lithographic Printing, but the ink layer is applied to the outer surface of the finished card and may include a clear coat. You may not be able to reprint on the card. The inks and clear coat are not compatible with D2T2 printing (Dye Diffusion Thermal Transfer, AKA dye-sublimation). The surface printing is durable enough for normal handling and use, but may wear more quickly in heavy use or swipe (magnetic stripe) applications. It is not recommended for high use applications, or for printing critical data such as emergency information. This process is often used for quick turnaround of simple text and graphics on card backs.

### Surface Hologram

Holograms are one of the most recognizable anti-counterfeiting devices on the market. The optically variable image cannot be duplicated with standard printing. Surface holograms are applied via hot stamping to the exterior of the card surface. This style of application is common to all financial transaction cards.

### Embedded Hologram

Embedded holograms are positioned under the rigid clear outer layer of the card surface. Unlike surface holograms, embedded holograms are amenable to dye sublimation – allowing the entire card surface to be personalized. This application style furthers the effectiveness of the anti-counterfeiting feature by requiring expensive specialized equipment during manufacture.

### Embedded Advantage™ Security Seal

The Advantage product is a specialized optically variable device that is manufactured in only one plant worldwide. It has been the OVD of choice for many government identity documents, including many states driver licenses and the INS card. Like the embedded hologram, this device is placed under the rigid clear outer layer and is not subject to surface abrasion and wear. Advantage images shift from orange to green at different viewing angles.

### Invisible Ultra-Violet (UV) Fluorescing Images

Common on credit card, currency and travel documents, invisible ink images provide a covert anti-counterfeiting mechanism. Though blue/violet fluorescing ink is readily available and inexpensive, red, green, yellow and orange fluorescing pigments remain difficult to acquire. This covert anti-counterfeiting device remains popular because of its relatively easy implementation in the field.

### Micro-fine Printing

Very small spot color printing that exploits the limitations of inkjet, toner based (laser) and dye sublimation printers. Counterfeit reproductions can be determined with a handheld magnification tool.

### Guilloche Printing

Fine line interlocking spot color patterns that are extremely difficult to scan and reproduce. These design elements are often multicolor and are commonly used on currency and travel documents.

### Composite Formulations

Composite formulations are designed for durable applications and for use in dye sublimation printers that employ re-transfer technology and/or polyester laminate patches. Composite cards will minimize the warping caused by such processes. These formulations derive their strength from combining biaxial Oriented Polyester (OPET) with traditional Polyvinyl Chloride (PVC).

### Custom Card Artwork Placement and Inkjet Location Guides

#### Standard PVC and Composite PVC/Polyester Cards

Company Name:		PO No.		Date	
Quantity:		Card and Artwork File No.			

#### 1. External Number

- Standard Location:** The standard external # location is shown on the template below. The external # can only be printed on the back of the card. The external # will be printed in the standard location, unless otherwise specified.
- Custom Location:** Indicate the desired external # location by writing 12345 on the appropriate template. The external # can only be printed on the back of the card.

**2. An Artwork File Number** is placed on each card. The standard location is indicated by the CCCCC. The standard location for the custom artwork number is on the back side of the card. Indicate/incorporate the artwork number on the artwork. If there will be front side printing only, the custom artwork number will be placed on the printed side, opposite the standard location.

**3. Artwork Placement:** Indicate the placement of your artwork on the template below. Custom artwork must clear the slot punch locations and edges by a min. of 0.125 inch.

**4. Magnetic Stripe (Optional):** If the location of the magnetic stripe is custom (other than standard) and/or if other types of magnetic stripes are to be added to the card (i.e. Debitek stripe), indicate the locations of the magnetic stripe(s) on the template.

Standard Location                       Custom Location

#### Card Artwork Templates

Slot Punch Indicators

12345 = Card ID Number  
 YYYYYYYY-YY = Sales Order Number

Front

Contact Smart Chip location to be embedded compliant with ISO 7816 on front or back side.  
HID does not recommend placing custom graphics on either side of the Contact Smart Chip area.

Back

**Optional Magnetic Stripe  
(1/2" HICO/High Energy OE)**

12345                      12345 YYYYYYYY-YY

↑                                      ↑

125 kHz #                      13.56 MHz #

#### Notes:

- <sup>1</sup> External # location reads in the direction as shown. External # character height is approximately 0.1 inch.
- <sup>2</sup> Cards will have a small HID logo and reference number printed in the lower left-hand corner and a slot punch target printed on the back of the card.
- <sup>3</sup> A standard custom artwork file number is printed on the back side of the card. Front side printing of this same number is an option.
- <sup>4</sup> Slot punch location indicators will appear on the back side of the card only.
- <sup>5</sup> Do not order slot punched cards for use in dye sublimation printers.  
Slot edge may damage the printer ribbon. Slot should be punched after dye sublimation printing.
- <sup>6</sup> Some video imaging printers cannot accommodate pre-slot punched cards. Consult with the printer manufacturer prior to ordering.

## Identity and Access Management Evaluation Kit Questionnaire

Thank you for your interest in HID's Crescendo evaluation kit.

To acquire the best evaluation kit, complete the following questionnaire.

Send your completed questionnaire to the following email address: [oneidentity@hidglobal.com](mailto:oneidentity@hidglobal.com)

Thank you for taking the time to complete this form!

**Note:** Questions marked \* are mandatory.

### CONTACT DETAILS

\*Your name: \_\_\_\_\_

\*Name of your organization: \_\_\_\_\_

\*Phone number: \_\_\_\_\_

\*Email address: \_\_\_\_\_

\*Evaluation Kit Delivery address:

Address 1: \_\_\_\_\_

Address 2: \_\_\_\_\_

Address 3: \_\_\_\_\_

Town/City: \_\_\_\_\_

ZIP/Postcode: \_\_\_\_\_

Country: \_\_\_\_\_

\*Nature of your business / organization

Systems Integrator:	<input type="checkbox"/>	VAR:	<input type="checkbox"/>
Distributor:	<input type="checkbox"/>	Installer:	<input type="checkbox"/>
Reseller:	<input type="checkbox"/>	Consultant:	<input type="checkbox"/>
End-user:	<input type="checkbox"/>	Other - specify:	_____

### PROJECT INFORMATION

Do you have an upcoming project in mind?

If so what type of business/organization will the cards be deployed in?

End-user business

Local/central government:	<input type="checkbox"/>	Healthcare:	<input type="checkbox"/>
Defense:	<input type="checkbox"/>	Education:	<input type="checkbox"/>
Police:	<input type="checkbox"/>	Energy:	<input type="checkbox"/>
Utilities:	<input type="checkbox"/>	Manufacturing:	<input type="checkbox"/>
Financial services:	<input type="checkbox"/>	Enterprise:	<input type="checkbox"/>
Other - specify:	_____		

Potential number of users in first year: \_\_\_\_\_

Potential number of users over next 5 years: \_\_\_\_\_

Likely timescales for deployment:			
< 6 months	<input type="checkbox"/>	< 12 months	<input type="checkbox"/>
< 2 years	<input type="checkbox"/>	Unknown:	<input type="checkbox"/>

**CARD REQUIREMENTS – CONTACTLESS CHIP**

\*Physical smart card applications click all that apply:

- Door Access:  ePurse/eVending/eTicket:
- Time and Attendance:  Secure Print Release:
- Mustering:  Car Park Access:
- Loyalty/Reward scheme:  Event Management:

Other - specify: \_\_\_\_\_

\*Contactless technologies, click all that apply:

- HID Prox:  Indala Prox:
- iCLASS:  MIFARE:
- LEGIC®:

Other - specify \_\_\_\_\_

Do you have any particular contactless chip coding requirements?  
\_\_\_\_\_

Do you have any particular contactless chip programming requirements?  
\_\_\_\_\_

**CARD REQUIREMENTS – CONTACT CHIP**

\*Logical smart card applications, click all that apply:

- Secure PC / Network Logon:  Digital Signature:
- Secure email:  Secure VPN/SSL:
- Secure Web Access:  Secure Single Sign On:
- Secure Pre-boot Authentication:  Secure Disk Encryption:

Other - specify: \_\_\_\_\_

\*Contact standards support, click all that apply:

- CryptoAPI / MSCAPI:  PKCS#11:
- Microsoft BaseCSP / Minidriver:  PKCS#15:
- FIPS140-2:  Common Criteria EAL:
- FIPS 201 (PIV):  BAC/EAC:
- EMV:

Other - specify: \_\_\_\_\_

**END-USER ENVIRONMENT**

Which operating system(s) will the cards be used with? – specify:  
Server (example: Windows 2003 Server): \_\_\_\_\_

Client (example: Windows XP or Vista): \_\_\_\_\_

Certificate authority – specify:  
(example Microsoft CA) \_\_\_\_\_

\* Do you intend to use a Card Management system? If so which one:

- Microsoft ILM 2007:  Bell ID CMS:
  - Intercede MyID:  AET BlueX:
  - ActivIdentity CMS:  None:
- Other - specify: \_\_\_\_\_

### CARD PERSONALIZATION

Are you interested in having your cards graphically personalized by HID?

Yes:  No:

If yes, state any requirements you may have.

### READERS

Do you have any requirements for contact/contactless readers?

If so specify.

For more information, go to [www.hidglobal.com](http://www.hidglobal.com) > Products & Solutions > Readers > OMNIKEY.

### PRINTERS

Do you have any requirements for printers?

If so, specify.

For more information, go to [www.hidglobal.com](http://www.hidglobal.com) > Products & Solutions > Card Printers.

### ACCESSORIES

Do you have any requirements for card accessories as card holders, yoyos or lanyards?

If so, specify.

### GENERAL

Where did you hear about Crescendo?

Salesperson:	<input type="checkbox"/>	Website:	<input type="checkbox"/>
Conference:	<input type="checkbox"/>	Advert:	<input type="checkbox"/>
Existing customer:	<input type="checkbox"/>		

Other - specify: \_\_\_\_\_

When may we contact you?

Feel free to include any other relevant information here.
