

**7-Outlet German
Power Distribution
Unit with Surge
Protection and
Switch**

333309

The equip[®] power distribution unit is a high-quality and robust product that was developed for the supply of power in data cabinets and ensures safety with its integrated surge protection. The power strip is carefully tested to ensure functionality and reliability. A 1.8m long supply cable and a built-in on/off switch complete the functionality of this power distribution unit. The optimized design also makes it easy to install. The ideal choice for 19" cabinet system installation.
