

Q-doc 100 Circular

Circular document holder

We worry about the vast quantities of plastic that end up in our oceans and seas. That is why we developed our own line of circular products.

In addition to being made from 60% recycled material, they are also 100% circular.

To prevent neck rotation, documents have to be placed between the keyboard and display screen. A sloping work surface reduces flexion of the neck and thus increases work comfort.

An 'in-line' document holder provides a functional work surface and realises short viewing distances between the document, screen and keyboard. The result is increased productivity.

Document holder made from plastic bottles, sustainable & ergonomic

BakkerElkhuizen goes circular. With the Q-Doc 100 circular document holder, we are introducing a sustainable version of our own acrylate product. This document holder consists of compressed material made from recycled plastic bottles. By reusing plastic bottles, we are doing our part to reduce the amount of waste on land and in our oceans.

An overview of the benefits

Recycled material

Our Q-doc 100 Circular Document Holder consists of 60% recycled material (3.9 recycled PET bottles), but is completely recyclable!

Circular

Plastic bottles are collected and processed into 'flakes'. These are processed into 'granulate'. This granulate eventually becomes a PET felt board. If you no longer use your product, you can return it to us for recycling. In short, 100% circular.

Soft, yet strong!

Although the material appears soft, no compromises have been made for the required properties such as load-bearing capacity. These products are also very strong, just like acrylic!

Price

This sustainable product does not cost more than the acrylate version of the same product.

Colours

These products are available in different colors. We have light grey and green in our range as standard. We are happy to get in touch with you for other colors.

In-line working

Working with a document holder prevents physical discomfort. This is because you position the documents in front of you (between your keyboard and monitor), so you do not have to turn your head.

Knowledge Center

An ergonomic workplace facilitates the comfort and productivity of their computer users. All it takes is a few changes to create the ideal workplace in line with office ergonomics guidance and best practice...
