1000BASE-T SFP+ Module Model AXM765v2

The AXM765v2 SFP+ module is a low-power, high-performance, 1000BASE-T transceiver. The AXM765v2 delivers 10 Gb network connectivity with cabling up to 262.5 feet (80 meters) of Category 6a (Cat 6a) or Cat 7 Ethernet cable.

The module is compatible with the IEEE 802.3az/an standard.

The switch automatically detects the module, so you can simply plug it into an available module slot. You can insert or remove the module while the switch is operational.

Install the Module

Insert the module firmly into a slot that supports the SFP+ interface. Make sure that the cable you use is a Category 5e (Cat 5e) or a higher-rated Ethernet cable (Cat 6, Cat 6a, or Cat 7). Supports links up to 80m using Cat 6a/7 Cable.

Remove the Module

1. Lower the latch on the front of the module.
2. Grasp the sides of the module and pull it straight forward out of the slot.
