

## HyperDrive® EnCryptPLUS FIPS 197 Edition

AES 256-Bit Hardware Encrypted USB

### Our Most Secure Encrypted Drive Yet

The new HyperDrive® EnCryptPLUS FIPS 197 Hardware Encrypted USB 3.0 Drive from Hypertec combines high level security with easy-to-use functionality to protect your Customer's data. The device features a [3 Year Warranty](#) and [Free UK based Technical Support](#) offering peace of mind for you and your customers.

Mandatory Encryption and Password protection guarantees 100% privacy of all data stored on the drive, providing uncompromised Security.

### Boost Margin with Hypertec Configured Services

The EnCryptPLUS FIPS 197 Edition can be customised to feature additional security with Bespoke Configuration Services from Hypertec. Using our [Easy Online Config Form](#), your customers can build their perfect secure device, which in turn generates more margin for you.

Bespoke Configuration Services include premium features such as **Custom Branding & Menus, Added Port Control, Repatriation Service** and more. We can also provide you with [Unique Part Codes](#) for your customers once they have configured their unique product, allowing them to order from you again quickly and easily.

Speak to your Hypertec Account Manager today to find out more about the EnCryptPLUS FIPS 197 Edition and our [Bespoke Configuration Services](#).
