

## ProDockEssential

Universal USB-C Dock with HDMI®, VGA and DisplayPort™

### Simple, Effective USB-C Connectivity

The ProDockEssential Universal USB-C Docking Station provides a simple and effective connectivity solution for charging, data transfer and video display from USB-C devices. Users can choose between HDMI®, VGA, or DisplayPort™ for video output, or use all 3 at once with simple plug and play design.

### Display, Charge, and Transfer with ease

Featuring a handy stowable USB-C cable, the ProDockEssential can display 1080p video simultaneously from HDMI®, DisplayPort™ and VGA ports while also delivering 60W power to USB-C equipped laptops, tablets, or smartphones.

Transfer data with ease and speed, with a 10Gbps USB-C data port and 5Gbps USB 3.0 ports, which are also backward compatible for USB 2.0 devices.

Portable and lightweight, the ProDockEssential is ideal for charging, data transfer, and video display in virtually any working environment.
