Energy Efficiency
Approximately 3 months of use on a full battery charge**

Longevity
Durable products designed to be easily refurbished.

Offering full transparency of their sustainability practices and targets, Contour Sustainable Product Data helps secure IT investment from companies looking to improve employee wellbeing, and sustainability initiatives.

Finding ergonomic products that help reduce environmental impact can be difficult. The green industry is packed with eco-friendly products that offer some sustainable features, but many either don't match expectations of what an eco-friendly product should be, or don't have the data to back up their claims.

That's where Contour are different. Offering an important tool to help business analyse and improve potential sustainability achievements, their Sustainability Data provides clarity and reassurance that investments in Ergonomics can not only help improve employee health and wellbeing, but also help contribute to minimising the overall environmental impact of the businesses.

For more information about Contour Sustainability, or to learn more about their full range of products, contact your Hypertec Account Manager today.
