

Avoid Repetitive Strain Injuries with the Unimouse

The award-winning Unimouse offers the ability to alter the vertical angle allowing for pressure to be taken away from the wrist, providing a great solution for relieving pain caused by conditions such as carpal tunnel syndrome.

The Most Adjustable Vertical Mouse on The Market

Designed to vary positions, the Unimouse enables users to switch postures during the day, helping to **minimise pain caused by repetitive strain injuries**. With 4 friction-based points of articulation, the Unimouse offers users **customisable and unique comfort**. Effortlessly switch postures to engage different muscles and tendons, while avoiding fixed, static positions.

35 Degrees of True Adjustability

The patented articulating hinge allows users to adjust the tilt angle of the mouse anywhere between 35 to 70 degrees. It features a friction-based system for an experience that is **simple, yet stable in any position**.

Unlimited Performance

The Lithium-Ion Polymer battery provides up to **three months of power on a single charge** and the Data+Charge cable allows users to charge while working to **help eliminate downtime**. The clever "Smart Sleep" battery system ensures a long-lasting wireless experience by hibernating when not in use.

Clicking with Unimouse

Unleash your creativity with 6 programmable buttons and an ultra-smooth scroll wheel. The **customizable button assignments suit virtually any task** and accommodate unique needs.

For more information about the Unimouse, or to learn more about the full Contour range, contact your Hypertec Account Manager today.

Features:

- ✓ 7 buttons
- ✓ Ten cursor speeds
- ✓ 2.4Ghz Wireless
- ✓ Long lasting, quick recharging battery
- ✓ Body Angle Adjustment: 35 degrees to 70 degrees
- ✓ Thumb Angle Adjustment: 35 degrees in either direction
- ✓ Plug and play USB installation
- ✓ Available in Left- and right-hand versions
- ✓ Two-year warranty

Reduce Pain, Avoid Strain and Work Faster
Contour Design is a market leader in the research, development and design of ergonomic computer mouse solutions such as the UltraMouse, Unimouse and Contour Mouse.
Contour provides evolutionary products that allow people to work safely at their computers without the risk of physical pain or injury. They incorporate precision engineering, advanced materials and superior design. Ergonomics is not a single solution, but rather a combination of effective and designed requirements, variables, flexibility and adaptability. Contour products offer the highest degree of ergonomics and also engage variables and improved health, flexibility, vision, posture, and other mouse-related ergonomics variables with the right equipment, awareness, and prevention. Contour products are developed only to relieve pain, but to also prevent it.
